

00:26:30 Eleanor: How can we rate without knowing first what will be the treatment?

00:27:30 mack waggaman: Treatment is not the topic. We are prioritizing vulnerabilities.

00:29:37 Eleanor: I think you answered it.

**00:30:05 Caseylee Bastien: Would a forest restoration at the DPW yard be a priority for you?**

00:30:06 Eleanor: So for each site you are giving us the proposed treatment at the same time.

00:30:37 mack waggaman: 1

00:31:14 judyisacoff: High priority — 1

00:31:20 Town of Mount Washington: What number signals the least amount of interest

00:31:25 Eleanor: Quick question: are you saying that the dredging will remove the phragmites?

00:31:34 Tom Badger: I'm not seeing the voting option.

00:31:38 Town of Mount Washington: 2

00:32:01 Tom Badger: 1

00:32:21 Cory Hines: priority #1

**00:38:11 Caseylee Bastien: What priority would you give restorations of drainage to Karner Brook and species management in the area?**

00:38:24 mack waggaman: 1

00:39:21 Town of Mount Washington: 1

00:41:00 Tom Badger: Clarification? SO this project would consist of sediment control from gravel roads and barberry control along the stream corridor??

00:41:47 Tom Badger: 2

**00:46:52 J Cotter: Lee Pond Brook East St and Wetlands from East st to Becker Pond**

00:47:03 mack waggaman: 1

00:47:04 Tom Badger: 2

00:47:08 Eleanor: I didn't know that Schenob Brook is up here.

00:47:09 Ian Collins: What would treatment be in this scenario? Dig up that “corduroy road” and replace?

00:48:05 Ian Collins: This section of road suffers immensely during “mud season”

00:48:57 mack waggaman: how will road improvements protect the wetland complex?

00:48:59 Jim Lovejoy: the town just spent an awful lot of money on that road

00:49:21 judyisacoff: J.I. High priority #1

00:50:31 Ian Collins: Would there be applications of herbicides?

00:50:52 Eleanor: That is not Schenob Brook. I am looking at a map. South of Becker Pond it is Sage's Ravine Brook.

00:51:39 Ian Collins: High Priority #1

**00:55:06 J Cotter: West st Hatch Hill Rd to East st**

00:55:25 mack waggaman: 2

**00:59:57 J Cotter: City Brook to Gilder Brook**

01:00:16 mack waggaman: 2

01:00:26 Justin Torrico: 2

01:00:46 pierrechee: 2 votes

01:02:16 Justin Torrico: what do you think ?

01:02:23 Justin Torrico: Why so few votes?

01:02:24 Jim Lovejoy: What are you going to do about the water?

01:04:03 Jim Lovejoy: Can we cultivate non biting mosquitos

**01:04:35 J Cotter: Garret Memorial Park - as Habitat showcase**

01:04:44 Tom Badger: 2

01:05:21 pierrechee: 2 votes

01:06:23 pierrechee: The two votes represent Pierre and Genève

01:06:37 pierrechee: Priority 2

01:06:43 Malaika Benjamin: Does the town's plan to move the schoolhouse to that area impact the potential planning for this flood plain zone (using your terminology)?

01:11:34 pierrechee: To be clear, the Garrett Memorial Park idea sounds great, and we generally support further planning . However, it is not as important to us as many of the other issues being detailed here. Not sure if our voting 'priority 2 'meets the voting delineations.

01:13:04 Tom Badger: Could you restate exactly what the Hunts Pond project would entail?

01:13:29 pierrechee: Ok thank you. We weren't sure of the amount of priority categories.

01:14:01 Tom Badger: Thank you.

01:14:17 Tom Badger: 1

**01:14:23 J Cotter: DCR Hunts Br Culvert & North Whitbeck Rd**

01:14:43 mack waggaman: 1

01:14:59 judyisacoff: High priority #1

01:16:09 mack waggaman: Is this part of the earlier discussion about East St?

01:18:04 Ian Collins: What about the private properties in these maps? Would this work impact or affect them?

**01:18:07 J Cotter: South East St Culverts and Borders/Slopes around Alander and Frisell trails heads**

01:18:13 mack waggaman: Would this project recommend permanently closing the road at the CT Border?

01:18:15 Tom Badger: 1

01:19:37 Ian Collins: What are the green dots?

01:20:41 judyisacoff: Clarify work on this section.

01:22:40 Ian Collins: Would there be applications of glyphosate or anything like that?

01:22:52 judyisacoff: State the benefits of closing the road at the border?

01:23:20 pierrechee: Before we move fully off of the Hunts Pond area, I'd like to note that beavers were trapped/drowned the year before last and also possibly last year. It seems that they are back this spring. As they significantly modify their habitats, maybe this is a reasonable forum to bring our concern and opposition to the possibility that the beavers would be "removed" again. Perhaps the beavers are not part of this specific conversation, but they certainly must be relevant and we would like the community to be aware of this, and maybe you could speak to this. Thanks- Genève

01:25:36 pierrechee: Yes thank you

01:25:45 Ian Collins: High Priority #1

01:29:35 Tom Badger: 1

**01:29:40 J Cotter: Support of Public private interface i.e., driveways**

01:29:49 mack waggaman: 1

01:33:30 mack waggaman: North end of West Street interface with wetlands

01:35:39 mack waggaman: whole area has lots of invasives

**01:38:20 J Cotter: North End of West St near wetlands**

01:38:38 mack waggaman: 1

01:39:02 judyisacoff: Moderate priority for care at trailheads

01:40:05 Town of Mount Washington: If people did not have a chance to vote tonight, can they still do that later?

01:40:38 Ian Collins: There are a few sections of East St on the dirt road by Lee Pond where there seems to be wetland that haven't been discussed.

01:43:08 Ian Collins: That first section is what I'm referring to.

01:46:22 mack waggaman: no 10 ft streams on East St

01:50:29 Jim Lovejoy: Thanks very much for your presentation. Got to go.

02:06:42 pierrechee: Thank you. This was very interesting and informative.

02:07:03 Tom Badger: Thank you so much for your efforts. Very interesting process.

Notes:

Town of Mt Washington votes are Justin Torrico votes since he was initially signed in as the Town.

Pierre Chee was Geneve Brousard
